## LAB COMPOSITE

### PRODUCT DESCRIPTION

Resilab Master is a highly mimetic lab composite that achieves a perfect balance between aesthetic and functional properties, allowing precise reproduction of the original tooth anatomy. It is the first Brazilian composite fully developed according to the VITA Classical Shade Guide.

### INDICATIONS:

Resilab Master is indicated for the fabrication of anterior and posterior crowns and bridges. It is also can be applied over metal frameworks, as well as inlays, onlays and veneers.

### COMMERCIAL PRESENTATION:

- Dentin - 4g syringe
- Enamel - 4g syringe
- Translucent - 4g syringe
- Opaque - 1,2g syringe

# RESILAB MASTER

## MODELING FLUID

### **PRODUCT DESCRIPTION**

Modeling Fluid for Resilab Lab Composite indicated to aid in the modeling and reactivation of the dispersion layer of light-curing materials used for aesthetic restorations.

### **INDICATIONS:**

Aids in the modeling process – reactivates the dispersion layer of light-curing materials used for aesthetic coating.

### **COMMERCIAL PRESENTATION:**

5ml bottle of Resimix.

**RESIMIX**  
MASTER

## TEMPORARY FILLINGS COMPOSITE

### PRODUCT DESCRIPTION

PROVIMASTER F is a radiopaque temporary filling material used in procedures that require tooth protection before to the final restoration. PROVIMASTER F provides adequate resistance to temporarily withstand the wear caused by mastication while ensuring easy removal, eliminating the need for final cavity preparation before fitting the final prosthesis

### INDICATIONS:

It is indicated for inlay/onlay techniques, crowns, bridges, relining of temporaries restorations, sealing of temporary endodontic treatments, and implant components.

### COMMERCIAL PRESENTATION:

Blister pack with a 3g syringe (universal shade) and 1 instruction for use.

**PROVI** MASTER F  
Contem fluor

## UNIVERSAL NANOHYBRID COMPOSITE

### PRODUCT DESCRIPTION

Nanohybrid resin is indicated for direct restorations in anterior and posterior teeth.

### INDICATIONS:

Designed for the direct reconstruction of enamel and dentin in permanent teeth and restorative procedures for all cavity classifications (classes I, II, III, IV, V, and VI), as well as for aesthetic corrections, veneers, inlay/onlay techniques, crowns, table tops, and stabilization of anterior and posterior teeth.

### COMMERCIAL PRESENTATION:

#### KIT:

Dentin S – 4g syringe: shades D1/D2

Enamel – 4g syringe: shades 1M1/1M2/2M2/3M2

Incisal – Match Clear

Adhesive – Match Bond U

#### REFILL:

Dentin – 4g syringe

Enamel – 4g syringe

RESINAS **MATCH  
3D**

## UNIVERSAL NANOHYBRID COMPOSITE

### PRODUCT DESCRIPTION

Nano hybrid resin is indicated for direct restorations in anterior and posterior teeth.

### INDICATIONS:

Suitable for direct reconstruction of enamel and dentin in permanent teeth and for restorations of all classes I, II, III, IV, V and VI. It is also indicated for aesthetic corrections, veneers, inlay/onlay techniques, crowns, table tops and stabilization of anterior and posterior teeth.

### COMMERCIAL PRESENTATION:

Kit:

Enamels - 4g syringe: shades A1/A2/A3/B1

Dentin S - 4g syringe: shades: D1/D2

Incisal: Match Clear

Adhesive: MatchBond U

RESINAS **MATCH CLASSIC**

---

## ADHESIVE FOR LIGHT- CURING RESINS

**ADESIVO**  
**MATCH  
BOND**

### PRODUCT DESCRIPTION

MATCH BOND Universal Adhesive, free of alcohol and acetone, is indicated for application on enamel and dentin after proper acid etching. The materials polymerize (harden) with the use of halogen or LED light.

### INDICATIONS:

Match Bond Adhesives are used in conjunction with light-curing resins for direct reconstruction of enamel and dentin in permanent teeth and for restorations of all Classes I, II, III, IV, V and VI in aesthetic corrections, laminate veneers, inlay/onlay techniques, crowns, table tops and the stabilization of anterior and posterior teeth.

### COMMERCIAL PRESENTATION

Bottle with 5ml MATCH BOND U – Universal Adhesive.

Bottle with 5ml MATCH BOND ED – Dentin Adhesive

## STAINS KIT FOR COMPOSITE RESIN CHARACTERIZATION

### PRODUCT DESCRIPTION

Master Color is a high-performance light-curing composite resin developed for the extrinsic characterization of dental structures. With a wide range of pigments, it provides a natural and aesthetic finish for restorations and dental prostheses.

### INDICATIONS:

Indicated for the characterization of:  
Composite resin teeth (ceromer).  
3D-printed resin prostheses.  
Acrylic teeth and artificial gingiva.  
Recommended for inlays, onlays, veneers, and resin prostheses.

### COMMERCIAL PRESENTATION

Stains Kit for Composite Resin Characterization:  
11 (eleven) syringes of 1.2g and 1 (one) Glaze of 15ml.

Colors: Base , Violet Gray, Blue, Caramel, White Black, Mustard, Pink , Red, Yellow.

Stains kit for Gingiva Characterization:

06 (six) syringes of 1.2g and 1 (one) Glaze of 15ml.  
Colors: Light Pink, Brown Pink, Medium Pink, Black Pink, Red Pink, Purple Pink.

---

## LIGHT-CURING GLAZE FOR ALL DENTAL RESINS

### **PRODUCT DESCRIPTION**

MasterSeal is a 3-in-1 light-curing glaze for acrylic resin, printed materials, and ceromers.

### **INDICATIONS:**

Indicated for full or partial prosthetic work. Once applied, the varnish penetrates the porosities of the acrylic piece and, after polymerization, effectively seals them.

### **COMMERCIAL PRESENTATION:**

15ml bottle of liquid.

# MasterSeal

## 3D PRINTING RESINS

### **RESILAB 3D PREMIUM MODEL: COLORS SKIN, GRAY AND YELLOW**

Resilab 3D Premium Model is perfect for creating patient oral mouth models for restorative or prosthetic workflows. The resin produces highly durable models in three colors: Skin, Gray, or Yellow. Available in 1Kg packages.

### **RESILAB 3D CLEAR: FOR SPLINTS**

Translucent resin with excellent resistance. It is indicated for the fabrication of bruxism splints and myorelaxation splints. Available in 500g and 250g packages.

### **RESILAB 3D GINGIVA: FOR GINGIVA SIMULATION**

Flexible pink-colored resin designed for gingiva simulation in dental prosthesis models. Not intended for intraoral use. Available in 500g and 1Kg containers.

### **RESILAB 3D CAST: FOR CASTING AND INJECTION**

Resilab 3D Cast is suitable for metal alloy casting and ceramic injection. Its high burnout performance and exceptional strength ensure superior results and detailed precision during the casting process. Available in 500g and 1Kg containers.

### **RESILAB 3D CAST WAX: BURNOUT RESIN WITH WAX FILLER**

Blue-colored burnout resin with wax filler for injection processes. The wax component enhances flowability, ensuring a smooth transition in pressable ceramics. Its composition provides highly detailed prints with a smooth texture and surface finish. When burned out it leaves no residue enabling the production of high-precision PPR frameworks or metal teeth.

### **RESILAB 3D TEMPORARY 0M2/A1/A2/A3/B1: FOR TEMPORARY RESTORATIONS**

3D printing resin for temporary crowns, inlays, onlays, and veneers. The resin is biocompatible.

### **NANOLAB 3D: NANOHYBRID RESIN**

Nanolab 3D is a long-lasting temporary nanohybrid resin, combining ceramic particles for strength and nanoparticles for enhanced aesthetics, resulting in natural-looking teeth. It is biocompatible offers the natural translucency of teeth and is also radiopaque. Available in 500g and 250g containers.

## GLASS IONOMER CEMENT FOR RESTORATION AND LINING

**IONOMASTER  
R PLUS**

### PRODUCT DESCRIPTION

Ionmaster R Plus is a radiopaque, two-component glass ionomer cement used in dental treatments for tooth restoration. The product is highly biocompatible.

### INDICATIONS:

Restoration of primary teeth, including class I cavities.  
Repair of cervical erosions and class V restorations.  
Class III restorations and selected class I cases.  
Core build-ups for crowns.

### COMMERCIAL PRESENTATION:

10ml bottle of A2 liquid  
10ml bottle of A3 liquid  
10g bottle of A2 powder  
10g bottle of A3 powder

## GLASS IONOMER CEMENT FOR CEMENTATION OF PROSTHESES AND ORTHODONTIC BANDS

**IONOMASTER**  
**C PLUS**

### **PRODUCT DESCRIPTION**

Ionmaster C Plus is a two-component glass ionomer cement used in dental treatments for the cementation of crowns, inlays, orthodontic bands, and the filling of classes III and IV restorations. The product is highly biocompatible and provides excellent marginal sealing (Type I: coating and repair).

### **INDICATIONS:**

Indicated for the cementation of prostheses and orthodontic bands.

### **COMMERCIAL PRESENTATION:**

15g powder bottle.  
12ml liquid bottle.

## HIGH ABSORPTION COTTON ROLLS

### PRODUCT DESCRIPTION

Masterroll is used during dental procedures that require cotton for liquid absorption throughout the process.

### INDICATIONS:

Indicated for use during dental treatments.

### COMMERCIAL PRESENTATION:

Packages containing 500 units of cotton rolls No. 1 and No. 2.

**MASTERROLL PLUS**

## WILCOS PREMIUM MIRROR LINE

### COMFORT PLUS

Front surface mirror (first plane).  
Clear and bright reflection in natural colors, providing high eye comfort and helping to prevent fatigue during work.  
Easy to clean due to the non-stick coating.

### COMFORT HD

Front surface mirror (first plane).  
High-definition image projection.  
High-resistance anti-stick glass for disinfection and sterilization.

### COMFORT PLUS (with magnification)

Front surface mirror (first plane) with magnification for situations requiring high visibility, featuring high-strength, non-stick glass for disinfection and sterilization.

### MEGA LUX

Front surface mirror (first plane).  
One-piece, without welds, preventing residue retention and offering greater comfort and biosafety.

### RELAX PLUS

Front surface mirror (first plane) made of fiberglass.  
Coated with rhodium, it becomes an excellent light reflector and resistant to acids.  
Autoclavable and resistant to chemicals and color changes.

CHECK THE AVAILABLE COLORS!

Most Wilcos mirrors are coated with rhodium mineral (more expensive than gold).  
Rhodium protects and reflects colors with a more pleasant touch.

## WILCOS INOX INSTRUMENTS

### PRODUCT DESCRIPTION

Wilcos has been a pioneer in the distribution of medical and dental instruments in Brazil since 1938 providing the market with the finest instruments through our brand, Wilcos Inox. All instruments are made of stainless steel and manufactured under a rigorous quality control process, ensuring a 10-year warranty against manufacturing defects.

Get the best and most reliable instruments on the market.

**Contact us for models and pricing.**

## WILCOS MASTER STEEL AND POLYESTER STRIPS

### POLYESTER STRIP.

Used for the refinement of interproximal restorations and finishing of composite resin-based restorations.

### STEEL STRIP.

Indicated for finishing and polishing of interproximal faces.

## HIGH-QUALITY BURS AND FILES

### LIMAS K

Used for the exploration, enlargement, and preparation of root canal walls. Lower risk of fracture due to its square cross-section.

### LIMAS H

Excellent cutting ability for root canal enlargement using the manual technique. Its teardrop-shaped (conical) tip prevents canal perforation.

### LIMAS FLEXILE

The Flexile Wendo files have a triangular cross-section, providing better flexibility in root canal preparation.

### EXTIRPA NERVOS

For easy and safe removal of pulpal tissue, 32 barbs symmetrically distributed in the core. They are resilient, preventing canal perforation with proper use. Short Styrypanervos with a plastic handle.

### CONDENSADORES SPREADERS

For the lateral condensation technique of gutta-percha with a point.

### CONDENSADORES PLUGGERS

For the vertical condensation technique of gutta-percha without a point.

### BROCAS GATES / PEESO (LARGO)

For the vertical condensation technique of gutta-percha without a point.

### LENTULO PASTE CARRIERS

For filling the root canal with endodontic materials.

Contact us for models and pricing.

## OIL LUB

### PRODUCT DESCRIPTION

ProForm is a cleaning and lubricating agent reinforced with imported graphite additives, ideal for the maintenance of high-and low-speed dental instruments.

### INDICATIONS:

It is indicated for the maintenance of all types of high-and low-speed dental instruments including turbines with ceramic bearings, accessories/connectors and pneumatic sonic scalers. It can be used with all types of adapters.

### COMMERCIAL PRESENTATION:

Bottle with 200ml/190g.

**PROFORM**<sup>TM</sup>  
**PREMIUM**

## SUTURE THREAD

### PRODUCT DESCRIPTION

It is indicated for suturing gingival surfaces in surgical procedures.

Stainless steel needle, monofilament nylon thread, and silk thread.

### INDICATIONS:

It is indicated for suturing gingival surfaces in surgical procedures.

It should only be used by qualified professionals.

### COMMERCIAL PRESENTATION:

Box with 24 units, sizes 2.0, 3.0, 4.0, 5.0, and 6.0 in lengths of 45cm or 75cm.

## ELECTRIC MOTOR WITH PREPARATION HIGH PERFORMANCE

### PRODUCT DESCRIPTION

Wpro electric motor: the only electric motor in the world that is completely independent of equipment, portable and with its own water reservoir, a great ally to perform your clinical technique, making preparations with excellence and clarity so that you can perform a detailed and faithful digital scan.

### INDICATIONS:

Indicated for cleaning aligners, removable orthodontic appliances, removable dental prostheses, bite plates, apnea devices, mouthguards, and similar oral devices.

# WPRO

## W<sub>Max</sub>

1:5 speed-increasing contra-angle designed for high performance, precision and ergonomics.

## ALIGNER DENTAL

### PRODUCT DESCRIPTION

Masterclean is an antibacterial aerosol foam designed for cleaning aligners, removable orthodontic appliances, dental prostheses, bite plates, apnea devices, mouthguards and other oral appliances.

### INDICATIONS:

Indicated for cleaning aligners, removable orthodontic appliances, removable dental prostheses, bite plates, apnea devices, mouthguards and similar oral devices.

### COMMERCIAL PRESENTATION:

Bottle with 150ml / 125g
